Rosson's Roundup

Congratulations to Danny Klinefelter who received the 2015 Agricultural and Applied Economics Association Award for an individual with 10 or more years of experience. Thanks, Danny for your dedication and excellence in building this award winning program, and congratulations again!

Congratulations are also extended to our Agricultural and Applied Economics Quiz Bowl Team members (see picture). The team composed of Madi Holmes, Macy Herzog and Josh Peterson finished 7th while Logan Cline, Betsy James and Kaitlyn McCarty finished 9th. Sara Baker and Katie Fisher were the alternates and the teams were coached by Dusty Menzies. Thanks to all of you who participated in this important event and congratulations on a job well done!

The AAEA meetings in San Francisco were very well attended. The reunion Monday night went extremely well, with many former students and faculty finding time to drop by and say Howdy! Thanks to all of you who made the trip out west and helped make these meetings a success.

We are still in the process of migrating our computers to the Texas A&M University computer support system. I'm hoping this will be complete by the end of next week, but we shall see how things progress.

Have a great weekend, and try to stay cool, if you can.

More about Aggies in France 2015

This year, 14 students from Agricultural Economics and several other departments in the College of Agriculture and Life Sciences participated in the France Agribusiness program. The program ran from May 27 through June 26 and was conducted in partnership with the Ecole Supérieure d'Agriculture (ESA) in Angers, France. The program provides a unique opportunity for our students to learn about French and European agriculture, and get immersed in French history and culture. During three weeks in Angers, students attended a variety of lectures covering topics such as French food culture, sustainable agriculture, viticulture, marketing of food products, etc. The students also visited a number of farms and agribusiness enterprises, including the Rungis wholesale market near Paris (the largest in Europe), a camembert farm in Normandy, and several vineyards in Loire valley. The program also included cultural visits to Paris and Normandy. The students got an opportunity to visit the famous landmarks of French capital and several WWII sites including invasion beaches, Pointe du Hoc, and the American Cemetery. Special thanks to the Department and College Administration as well as Study Abroad Program Office for supporting this program and helping to make it another successful year. We will start recruiting students for the 2016 program in September.

Dmitry Vedenov.
